
Actors:

Admin: is a management user. Manages user privileges, adds new users, updates their status and removes users.

Student: is a common user. Only able to log in, log own attendance and view own attendance.

Teacher: is a management/admin user. Able to log users, create new tracking systems for courses, view overall statistics for attendance and open tracking for users (students).
Student counselor: is a passive user. Gets notifications from students when a certain threshold for attendance is met.

Use cases:

- Log in & log out:
- Manage users: Admin can add new users, update their status and remove old users.
- Track own attendance: Students can track their attendance per course.
- Log own attendance: Students can log their attendance per course.
- Open tracking for students: Teachers can open tracking for students so they can log their own attendance.
- Track attendance statistics: see attendance statistics per course and per students
- Attendance alert: If attendance is under a certain threshold, the student counselor will get notification from the system.
- Log student attendance: Teachers can log attendance for students.
- Manage courses: Teachers can manage attendance tracking per course by making, updating and deleting/storing them.
- Generate attendance reports: Teachers can generate reports for individual students and whole courses attendance statistics.
