Fill one row per issue found. Use Screenshot to note a filename, link, or 'N/A'.

No	Heuristic	Description of the Issue	Screenshot	Severity	Suggested Improvement
1	H1-1: Simple & natural dialog	Managing lessons and courses can feel slightly confusing at first, as the structu		2 – Minor	Make the layout simpler and easier to understand.
2	H1-2: Speak the users' language	Some interface text is a bit unclear for first-time users, making it harder to imme		2 – Minor	Use clearer and more descriptive terms in the interface so users can easily understand actions.
3	H1-3: Minimize users' memory load	The login form does not include a "show password" feature, forcing users to remember and recheck their input.		2 – Minor	Add a "show password" toggle to reduce input errors.
4	H1-4: Consistency	There are minor layout differences between pages, which can make the interface feel slightly inconsistent.		1 – Cosmetic	Keep layout structure consistent across all views.
5	H1-5: Feedback	The system does not always clearly confirm actions (e.g., saving attendance or login success/failure).		2 – Minor	Add clear feedback messages like "Attendance saved successfully" or "Login failed".
6	H1-6: Clearly marked exits	After completing actions (such as creating a course), the system does not clearly guide the user on what to do next.		1 – Cosmetic	Provide clear navigation options or suggestions
7	H1-7: Shortcuts	The system lacks efficiency features for experienced users (e.g., quickly marking		2 – Minor	Add options like "Mark all present" to speed up repetitive tasks.
8	H1-8: Precise & constructive error messages	When users enter incorrect or incomplete information, the system does not always clearly highlight what field is wrong.		2 – Minor	Make error messages more specific by pointing to the exact field (e.g., password or username) and visually
9	H1-9: Prevent errors	The system allows users to perform actions without confirmation, which may lead to accidental changes (e.g., marking attendance incorrectly).		1 – Cosmetic	Add confirmation prompts or undo options for important actions.
10	H1-10: Help and documentation	The system does not provide help or guidance for new users.		1 – Cosmetic	Add a help section, tooltips, or short instructions for key features.
